

KNOW MORE. ACT FASTER.

# BUSINESS VALUE DISCOVERY

Discover how much cash is hidden, trapped or at risk in your SAP system...

... IN JUST **5** DAYS!

**The world is changing.** Customers are now more demanding, technology more disruptive, and markets more volatile. Change is the new normal. To compete in this world of change, business leaders are under constant pressure to become more innovative, more adaptive and more efficient. However, there is also the consistent demand to deliver improving returns, creating a balancing act to do much more, with much less.

**To address these challenges, companies need to understand whether they are in control, and if not why.** However, too often knee-jerk reactions such as reducing headcount, slashing inventory, cutting expenses or cancelling events and training are the first port of call. Which may be good for short-term profits, but not so good for long-term growth and innovation.

But what if there was a better way? What if there was a way that you could uncover and free your valuable human, inventory and financial capital so that they can be reallocated to more value-adding activities.

**What if this offering was risk-free?**

**What if it only took one week?**

**Impossible right?**

Wrong.

To achieve this requires insight into your SAP system, your processes, your data. Insight that normally requires months of consultancy time, questioning, analysis and investigation.

Not anymore.

**“ We were able to show the operating companies where they can save a lot of money and improve their processes – and we did that with a budget of zero as we had Every Angle ”**

Leonard Stein,  
Heineken International

Identify the waste...  
 Monetize the benefits...  
 Release the value!

SAP® Certified  
 Powered by SAP NetWeaver®

SAP® Certified  
 Integration with Applications on SAP HANA®

With Every Angle's 'Business Value Discovery' offering, we have this insight built into our system, cutting short all of the analysis time to just five days. In just five days, we can uncover where significant value is either lost, trapped or at risk in your business - and how you can free it.

16 years of continual investigation and work with businesses who use SAP has allowed us to develop unique insight into the hidden locations where financial, physical and human capital gets trapped and wasted. Insight we have poured into our product and which is waiting to be used to unlock this value in your business.

These savings include identifying the purchases you can delay or cancel, the inventory that can be released, the costs that can be saved and the hours of effort you don't need to waste. Savings that, unlike normal cost reduction activities, will have a positive, not negative, impact on your levels of customer service.

Not only will we identify the immediate savings, but we'll also highlight reoccurring ones as well - recommendations that embed the benefits and enable businesses to:

- ✓ Turn inventory quicker
- ✓ Buy only what you need - when you need it
- ✓ Reduce the amount of non-value adding activities
- ✓ Increase cash-flow
- ✓ Remove risks

All of these findings will be quantified, explained, monetized and signed off with your team to ensure they are both realistic and achievable - as well as a proposal to realize them. No big claims of gazillions of savings - just realistic, identifiable and explainable value.

We are so confident that we will be able to uncover significant current and future savings, that we offer this risk-free. **If, by the end of the 5 days, we have not uncovered value that is at least 10 times greater than the project cost, then there will be no charge.**

## How does Every Angle discover your hidden cash?

**2. Qualitative Assessment - Understanding the Performance Improvement Potential**

So what are you waiting for?

Contact us now to discover just how much value is being lost, trapped or simply at risk in your business - value waiting to be released!
