

KNOW MORE. ACT FASTER.

EMPOWERING IT ANALYTICS FOR SAP®

# INFORMATION TECHNOLOGY

Understand whether SAP is under control...

*"Are processes being executed as designed?"*

*"How accurate is our master and transactional data?"*

*"Are the SAP housekeeping activities being completed on time?"*

*"Do business users have the capability to answer the critical business questions that arise?"*

*"What is the level of user satisfaction with SAP?"*

*"Are we getting a measurable Return on our Investment from SAP?"*

...and driving **real improvements** in business value!

**EA4IT:**

# UNLEASH THE VALUE OF SAP. FREE YOUR TEAM. EMPOWER THE BUSINESS.

*Bridge the gap between  
questions and answers*

## WE KNOW WHAT YOU ARE THINKING

*Not another software product. Not more interfaces, more risks, more upgrades, more complexity. However, fear not. We understand.*

We have ensured that Every Angle supports your requirements and brings as little added complexity and as few new headaches to the table as possible. This enables you to take a break from managing endless requests for new data and changes to reports, to focusing on more strategic activities. This is a win-win, providing the business with an easy-to-use solution to their thirst for real business insight and intelligence, while also relieving yourself of the burden of providing this insight and the corresponding data and change management overhead.

Every Angle doesn't require a dataset to be developed by IT. Doesn't require constant maintenance. Doesn't require curating and staging. It also empowers business users with easy, engaging and empowering tools that simplifies the complexity of SAP, enlightens them with new insights and added fields and encourages them to maintain their data in SAP.

This dramatically reduces the amount of downloads users perform into tools like Excel, reducing the amount of effort users undertake whilst simultaneously reducing business risks caused by having multiple versions of the truth.

This has an immediate knock-on effect of driving users to maintain the integrity of aster and transactional data better.

Our users consistently report a significant improvement in user satisfaction in SAP – which translates to a better perception of the value IT delivers.

## EVERY ANGLE IS DESIGNED TO BE:

### EASY TO INSTALL

- ✓ Certified Integration with SAP / HANA
- ✓ Only requires 2-3 hours of IT support to setup
- ✓ No need for data curation, manipulation or staging
- ✓ Follows standard SAP installation procedure (DEV > QA > PROD)

### EASY TO DEPLOY AND SUPPORT

- ✓ Plug and play installation, low TCO and immediate business value
- ✓ Complete business self-service - Creates a self-service environment for users
- ✓ Frees IT from time consuming report and query creations - reducing the backlog of requests
- ✓ Minimal ongoing IT assistance and support required

- ✓ Easy user authorisation and support - 0.1 - 0.5 FTE day / week.

### SAFE TO RUN

- ✓ Compliant to IT regulations
- ✓ Data stays within the SAP datacentre - eliminates the 'jungle' of Excel reports and re-establishes control
- ✓ Users don't have direct access to data
- ✓ Process is configurable and monitored
- ✓ Personal password protected user accounts and authorisation profiles
- ✓ Data encryption capability - storage or transfer (from SAP to Every Angle, and EA to users)
